CLAIMS

What is claimed is:

1 1.

8.

translated words.

2

2	(a)	receiving a plurality of words for being translated;
3	(b)	identifying a context associated with the words; and
4	(c)	translating the words based on the identified context.
1	2.	The method as recited in claim 1, wherein the translation of the words
2		includes matching the words with a predetermined set of translated words.
1	3.	The method as recited in claim 1, wherein the predetermined set of translated
2		words is selected based on the identified context.
1	4.	The method as recited in claim 1, wherein the context includes a particular
2		industry in which the words are used.
1	5.	The method as recited in claim 1, wherein the words are received utilizing a
2		network.
1	6.	The method as recited in claim 1, wherein the words are technical words.
1	7.	A computer program product for translating words, comprising:
2	(a)	computer code for receiving a plurality of words for being translated;
3	(b)	computer code for identifying a context associated with the words; and
4	(c)	computer code for translating the words based on the identified context.
	(-)	

The computer program product as recited in claim 7, wherein the translation of the words includes matching the words with a predetermined set of

A method for translating words, comprising the steps of:

1	9.	The computer program product as recited in claim 7, wherein the
2		predetermined set of translated words is selected based on the identified

3 context.

- 1 10. The computer program product as recited in claim 7, wherein the context
- 2 includes a particular industry in which the words are used.
- 1 11. The computer program product as recited in claim 7, wherein the words are received utilizing a network.
- 1 12. The computer program product as recited in claim 7, wherein the words are technical words.
- A system for translating words, comprising:
- (a) logic for receiving a plurality of words for being translated;
- 3 (b) logic for identifying a context associated with the words; and
 - (c) logic for translating the words based on the identified context.
- 1 14. The system as recited in claim 13, wherein the translation of the words includes matching the words with a predetermined set of translated words.
- 1 15. The system as recited in claim 13, wherein the predetermined set of
- 2 translated words is selected based on the identified context.
- 16. The system as recited in claim 13, wherein the context includes a particular
- 2 industry in which the words are used.
- 1 17. The system as recited in claim 13, wherein the words are received utilizing a network.
- 1 18. The system as recited in claim 13, wherein the words are technical words.
